

Social Security: Vital to Hawaii Women and Families

Social Security is a family insurance plan that provides retirement benefits and life and disability insurance to Hawaii's working families.

- About 1 in 6 residents – about 227,900 people – receives disability, survivor, and/or retirement benefits from Social Security.
- 88 percent of residents 65 and older receive Social Security benefits.
- About 14,600 children receive Social Security benefits because of the loss of a parent's income due to death, disability or retirement.
- About 27,900 disabled workers and their family members receive Social Security benefits.
- About 15,500 widowed spouses receive Social Security survivor's benefits. (Nationally, women represent virtually all (99 percent) of spouses receiving survivor benefits.)

Hawaii women depend on modest Social Security benefits to get by.

- Women are a majority of both adult beneficiaries and beneficiaries 65 and older.
- The average Social Security benefit for women 65 and older is about \$12,400 per year, compared to about \$15,100 for men 65 and older.
- Older women rely more on income from Social Security than older men do. Median income for women 65 and older living alone is \$22,400 per year – and Social Security represents 54 percent of that amount. Median income for comparable men is \$34,300 – and Social Security represents 39 percent of that amount.

Social Security is a critical anti-poverty program for Hawaii women and families.

- Social Security lifted 57,000 residents out of poverty, including 2,000 children.
- Social Security dramatically reduced poverty rates for women 65 and older: from 33 to 9 percent for all women 65 and older, and from 56 to 19 percent for older women living alone.
- Social Security also reduced the poverty rate for Asian women 65 and older from 32 to 10 percent.
