The Importance Of Fair Pay For Illinois Women

April 2012

At the time of the Equal Pay Act’s passage in 1963, women working full time, year round were paid merely 59 cents for every dollar paid to their male counterparts. Enforcement of the Equal Pay Act and related civil rights laws has helped to narrow the wage gap, but significant disparities remain and must be addressed.

Women have struggled to regain jobs in the recovery and continue to face high levels of long-term unemployment, even as their families rely on them more heavily for financial support. Wages overall are stagnating and the wage gap has barely budged over the last ten years. The gap particularly harms women in these economically difficult times, when women and families are especially financially vulnerable. Although Congress has taken initial steps to improve the laws that govern pay discrimination by passing the Lilly Ledbetter Fair Pay Act of 2009, there is more that must be done to realize the decades-old promise of fair pay for equal work.

The Gender Wage Gap Persists in Illinois

Although the gap between men’s and women’s wages has narrowed over the past five decades, the typical woman continues to be paid substantially less than the typical man.

• In 2010, the typical woman in Illinois working full time, year round was paid only 76 cents to every dollar paid to a man working full time, year round – 1 cent wider than the nationwide wage gap of 77 cents.

• The wage gap is even more substantial for African-American and Hispanic women. White, non-Hispanic women working full time, year round in Illinois were paid only 73 cents to every dollar paid to white, non-Hispanic men working full time, year round. However, African-American women working full time, year round in Illinois were paid only 64 cents and Hispanic women only 48 cents, to every dollar paid to white, non-Hispanic men who worked full time, year round.

• The wage gap persists at all levels of education. In 2010, women in Illinois with a high school diploma were paid only 68 cents to every dollar paid to men with a high school diploma. Comparing women and men in Illinois with a bachelor’s degree the figure was 67 cents. In fact, the typical Illinois woman who has received a bachelor’s degree still isn’t paid as much as the typical Illinois man who has completed some college or attained an associate’s degree.

• The wage gap exists across occupations. For example, Illinois women working full time, year round in 2010 in management, business, and financial occupations were paid only 75 cents to every dollar paid to men in the same occupations, and Illinois women working full time, year round in sales and related occupations were paid only 63 cents to every dollar paid to men in the same occupations.
Fair Pay Is More Important to Illinois Women Than Ever in This Struggling Economy

In the current economic crisis, many people are facing financial problems, stagnant wages, and unemployment. Women in Illinois already have higher rates of economic insecurity than do men in Illinois: in 2010, women working full time, year round typically had lower earnings than men ($38,638 compared to $50,549)\(^{12}\) and were more likely to live in poverty (13.5 percent of Illinois women compared to 10.3 percent of men).\(^{13}\) As a result, women are particularly vulnerable to economic hardship in today’s struggling economy, when every dollar counts. For example:

- High unemployment rates for men have fallen since the end of the recession, but two-and-a-half years into the recovery, women’s unemployment nationwide remained above its level at the end of the recession.\(^{14}\) The unemployment rate for women in Illinois in 2011 was 8.8 percent, a 4.3 percentage point increase since the recession began in December 2007,\(^{15}\) and 50.0 percent of jobless women workers in Illinois had been looking for work for 27 weeks or more.\(^{16}\) Women’s lower earnings contribute to the fact that women frequently have fewer savings to fall back on if they lose their jobs.\(^{17}\) Nationally, the average weekly unemployment insurance benefit paid to women was $259, while the average benefit for men was about $310.\(^{18}\) Worse yet, women who lose their jobs are also less likely than men to receive unemployment insurance benefits at all.\(^{19}\)

- The economic crisis has affected all Americans, but has been particularly hard for women — who are already in a more precarious economic position than men because of lower earnings and higher poverty rates. Women are more likely to rely on public benefits like Medicaid, food stamps (SNAP), and housing assistance,\(^{20}\) services which many states have cut during the crisis.\(^{21}\) About 13 percent of non-elderly adult Illinois women and 38 percent of Illinois children relied on Medicaid in 2010.\(^{22}\) In December 2011, the most recent month for which data are available, Illinois provided food stamp benefits to almost 1,879,600 children and adults, an increase of nearly 77,400 from the previous year.\(^{23}\) For many low-wage workers, these programs provide crucial support to meet basic needs when wages aren’t enough. For example, for a full-time, year-round worker at Illinois’ minimum wage, the annual pay is less than the poverty line for a family of three.\(^{24}\)

- Recent tightening of state budgets has caused many states to cut back on necessary services. In Illinois, enacted cuts to education, Temporary Assistance for Needy Families, and housing\(^{25}\) disproportionately affect women and will create further hardship for Illinois women and their families.

- In 2011, women made up about two-thirds of all workers that were paid minimum wage or less, totaling almost 2.4 million women 16 and older.\(^{26}\) In Illinois, the minimum wage was $8.25 per hour, equivalent to only about $16,500 a year for those working full time year round. Moreover, the minimum cash wage for tipped employees in Illinois was just $4.95 per hour, equivalent to an annual base pay of only about $9,900 for those working full time, year round.\(^{27}\) Nationally, women make up almost two-thirds (64.0 percent) of workers in tipped occupations.\(^{28}\) Raising the minimum wage would help close the wage gap for Illinois women.

Fair pay would help close the wage gap and increase women’s economic security.

10 NWLC calculations from 2010 ACS, Table B20004: Median Earnings by Sex by Educational Attainment for the Population 25 Years and Over, available at http://www.census.gov/acs/www [last visited Dec. 9, 2011]. These data include all workers 25 and over and is not broken down by work experience.
12 Supra note 7.
14 Supra note 2.
18 U.S. Department of Labor, Employment and Training Administration, Office of Unemployment Insurance, Benefit Accuracy Measurement Survey (Dec. 22, 2011). Estimates based on sample cases from the BAM survey, which includes the State UI, Unemployment Compensation for Federal Employees (UCFE), and Unemployment Compensation for Ex-Service Members (UCX) programs only and does not include payments for Extended Benefits or Emergency Unemployment Compensation. Data are from October 2010 to September 2011, and do not control for hours worked (e.g. full-time vs. part-time status).
24 The current federal minimum wage is $7.25. For an individual who works full time, year round, (2,000 hours) this amounts to annual earnings of $14,500. The poverty line for one person and two children was $17,568 in 2010. U.S. Census Bureau, Current Population Survey, 2011 Annual Social and Economic Supplement, Table POVS3: Poverty Thresholds by Size of Family and Number of Related Children Under 18 Years: 2010, available at http://www.census.gov/hhes/www/cps/cps2011povertytables.htm (last visited Dec. 20, 2011).
27 Where state minimum wages fell below the federal level, states were listed as observing the federal minimum wage of $7.25 an hour for non-tipped employees and $2.13 an hour for tipped employees. Annual wage figures calculated assuming 40 hour work weeks for 50 weeks a year. Who constitutes a “tipped worker” varies by state.
28 NWLC calculations from U.S. Department of Labor, Bureau of Labor Statistics, Current Population Survey, Table 31: Employed persons by detailed occupation, sex, race, and Hispanic or Latino ethnicity, 2011 annual averages, available at http://www.bls.gov/ocos/cosaat11.pdf. Includes the following occupations: waiters and waitresses; bartenders; counter attendants, cafeteria, food, and coffee shop; dining room and cafeteria attendants and bartender helpers; food servers, nonrestaurant; taxi drivers and chauffeurs; parking lot attendants; hairdressers, hairstylists, and cosmetologists; barbers; miscellaneous personal appearance workers; baggage porters, bellhops, and concierges; and gaming services workers.
